TITLE : SILVER HALIDE PHOTOGRAPHIC
SENSITIVE MATERIAL

ABSTRACT : PURPOSE: To provide the silver halide photographic infrared sensitive material stable in storage and free from residual dye stains after development processing by incorporating a specified dye.

CONSTITUTION: This silver halide photographic sensitive material contains the photographic dye represented by formula in which each of R^1 - R^6 is alkyl; each of R^7 and R^9 is H or a nonmetallic atomic group necessary to form a 5- or 6-membered ring; R^8 is H or a substituent; X is an anion; and each of Z^1 and Z^2 is a nonmetallic atomic group necessary to form a benzo- or naphtho- condensed ring. This dye is added to the reverse side of a support or between the support and an emulsion layer, and it is effective as a filter dye and it is used, preferably, together with a binder.
